UV-C Air Purification Systems for Schools

Introducing a SAFE, EFFECTIVE, and EFFICIENT way to ensure clean air in your classrooms.

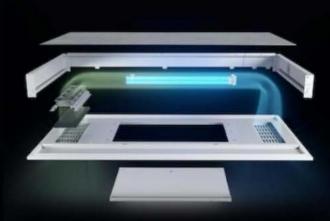

With the new COVID-conscious world we all live in today, schools and universities are focusing on new ways to implement safer environments in classrooms for students and faculty. Excel Energy Group is providing a solution to create cleaner air in your facilities through UV-C Lighting Fixtures. This ultra-violet lighting technology reduces the spread of airborne pathogens such as COVID-19, bacteria, fungus, and other viruses. With decades of research and testing, UV-C Lighting has proven to be completely safe and effective to implement. The installation of these fixtures is also a qualified expense for the government provided ESSER Funds that your school may have recently received.

Benefits of UV-C Lighting Fixtures:

- Reduces the spread of pathogens and continuously improves air quality
- Provides disinfection at the source
- Effective and safe for occupied rooms
- Provides an efficient, long-term solution for safer educational environments
- Increases HVAC efficiency
- Qualifies for ESSER II Funds

Contact EEG today to learn more!

Infected air is drawn through one side of the fixture by a fan, passed through a filter, and into a sealed UV-C chamber.

Pathogens passing through the chamber are neutralized, and clean air is then circulated back into the room.

QUALIFIED FOR YOUR ESSER II FUNDING

Things to Know About UV Disinfection

Decades of research and history demonstrate that UV can be highly effective at inactivating pathogens.

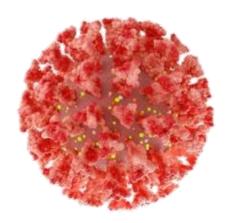

There is a large body of research covering all aspects of UV technology.

UV technology has the potential to inactivate a wide variety of pathogens. Below are some pathogens that can be inactivated by UV.

- MRSA
- Influenza
- E-Coli
- Salmonella
- Feline Calcivirus
 (surrogate for Norovirus)

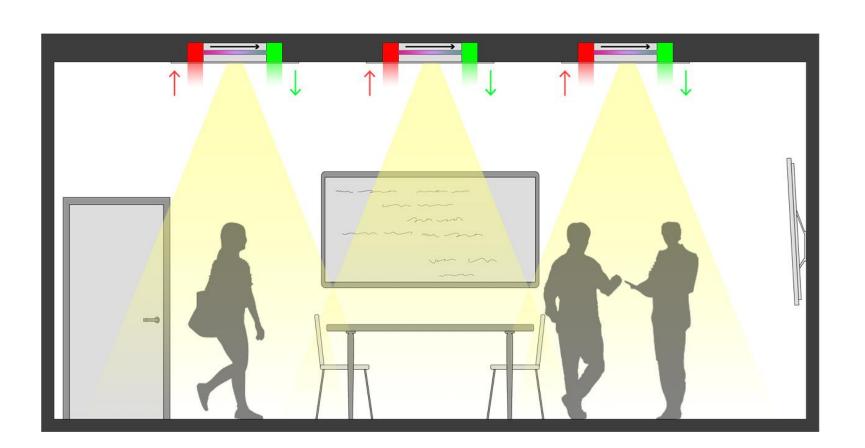

Initial independent laboratory testing has shown that 254nm and 222nm UV technology can inactivate SARS-COV2.

Modern Approach to Air Disinfection

Luminaire onboard air disinfection powered by UV Angel Technology

Occupants	Yes
Architectural integration	Minimal
Maintenance cycle	1 year

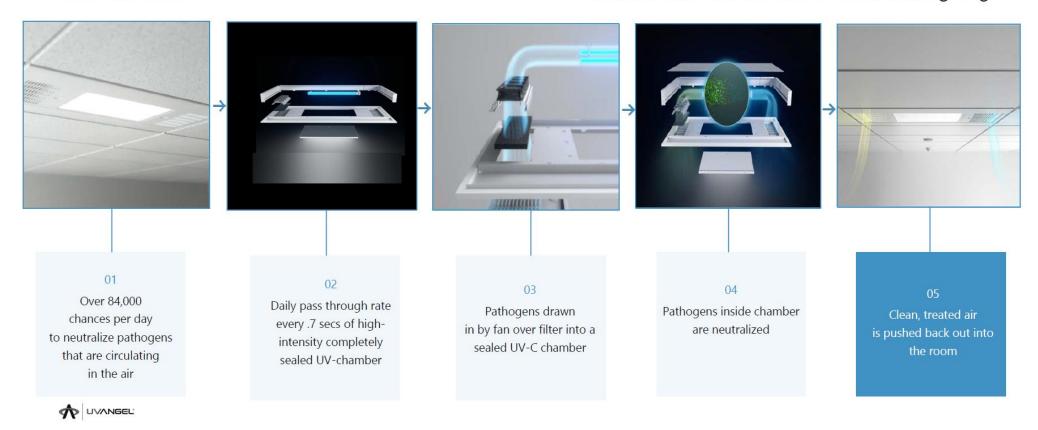

Pathogen Reduction Applicability: Continuously inactivates viruses in the air. Greater air changes improves efficacy compared to central HVAC solutions.

How it Works...

- Easily mounts in existing in-ceiling lighting or new construction Can be used in occupied spaces
- Less than 25 lbs.

- · Available with and without LED room downlighting

Executive Summary

Excel Energy Group, Inc. (Excel), conducted an analysis of the Millington Municipal School (District) facilities for the purpose of identifying opportunities to implement safe and effective air purification systems and technology. The analysis and subsequent evaluation has led us to recommend and propose the following UV-C air purification upgrades to the District's facilities.

1) UV-C Air Purification Design

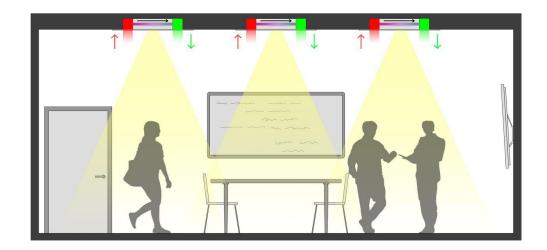

This project is implementing Acuity's state of the art UV Air Disinfection systems. Excel has partnered with Acuity to engineer a safe and effective project design for the Millington Municipal School's air quality improvements. The focus of this project's design is to provide an effective and efficient approach to disinfection of airborne pathogens. These systems reduce 99.9% of airborne pathogens as they pass through the disinfection system all while safely operating in an occupied space. Focusing on rapid air turnover for these specified target areas throughout the district, Excel is able to provide the District with an effective measure to combat not only COVID-19 but also other viruses, bacteria, and fungus. Excel has worked hand in hand with the manufacturer of this technology to implement a safe and effective way to ensure cleaner air in the district's facilities while the area is occupied.

2) Scope of Work

The installation of approximately 29 UV-C air purification fixtures is included in this project. This is an excellent project design that is specifically targeting high risk areas with these air purification systems. This localized approach to air purification would specifically focus on areas with higher risks of transmission. These areas would include nursing stations, teacher's lounges, work rooms, conference rooms, restrooms, locker rooms, SPED classrooms, and libraries.

3) ESSER II Funding Qualified

According to the Department of Education, Office of Elementary and Secondary Education "Addressing learning loss, preparing schools for reopening, and testing, repairing, and upgrading projects to improve the air quality of school buildings." are qualified expenditures for ESSER II funding.

UV-C Air Purification Systems Project

Millington Municipal Schools

Scope	Initial Cost
1 SPED FS Classrooms (3 Fixture Per Classroom)	\$24,640
² Nurse Stations	\$12,320
³ Main Offices	\$12,320
4 Family Resource Center	\$10,267
TOTAL PROJECT	\$59,547

NOTES FOR UVC SCOPE:

- 1) Scope of work includes installation of recessed UV-C fixtures with air sanitation technology. UV-C fixtures will be installed in rooms types listed above based on fixture density. Larger rooms will have an appropriately corresponding number of fixtures.
- 2) Project proposal includes the material for one complete replacement of UV-C bulbs and filters for all units included in the project. Based on manufacturers rated life, the District should expect no additional maintenance cost until after year six.
- 3) Total annual energy consumption is estimated to be \$750.

UV Air Disinfection Luminaire without Downlight

Type:

Project:

HIGHLIGHTS

- Air is circulated through the UV-C chamber, treated with the high-intensity UV-C light to inactivate bacteria, fungus, and viruses, and returned to the room for cleaner environment
- Aesthetically pleasing design operates quietly for continuous air disinfection
- Concealed UV air treatment chamber integrated into a 2x4 (0.6M x 1.2M) troffer platform allowing use in occupied spaces
- Engineered with advanced UV-C based pathogen control technology powered by UV Angel Clean Air™
- Designed to operate without interruption 24/7/365
- Installation available for drop-in grid ceiling, recessed hard ceiling, surface mount, or suspended
- Discreet down facing status indicator light for easy sight verification of operation or maintenance
- Tool-less UV lamp and filter service from below without need to access ceiling plenum

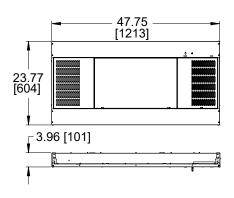

DIMENSIONS

COMPANION LUMINAIRE(S)

HFLV DN UV Air Disinfection Luminaire with Downlight

PATHOGEN REDUCTION EFFECTIVENESS

Average Pathogen Reduction Over Specific Control Time Within 800 ft³ (22.7M3) Space

	Calculated Pero	cent Reduction*
Pathogen	Control Time 1 Hour	Control Time 4 Hours
Staphylococcus aureus (S. Aureus) ATCC 6538	83.6%	99.9%
Cladosporium cladosporioides (Cladiosporium) ATCC 16022	61.1%	97.7%
MS2 Bacteriophage (MS2) ATCC 15597-B1	65.8%	

Third Party Clinical Validation

The pathogen reduction effectiveness of an equivalent to the EvolAIR UVTM HFLV UV Air Disinfection unit using UV Angel Clean AirTM technology has been tested by independent accredited third-party testing lab (Microchem Laboratory, Round Rock, TX) and a data analysis of the test results has been performed by Paul Arthur Jensen, PhD, PE, CIH (Final Approach Inc., Port Orange, FL) to calculate the percent pathogen reduction listed above.

UV Air Disinfection Luminaire without Downlight

Project:

Housing

Aluminum housing construction.

SPECIFICATIONS

Finish

Painted in durable polyester powder coat paint with antimicrobial additive. Gloss white and matte black colors available.

Lay-in grid mounting standard for recess T-grid acoustical ceilings. Fits standard 9/16" (14.3mm), 15/16" (23.8mm), and 1" (25.4mm) acoustical ceiling grids. Hard ceiling recessed mounting requires plaster frame kit. Hard ceiling surface mounting requires surface mount kit. Suspension cable kits also available for use with the surface mount kit. All kits require assembly in the field. Reference installation instructions for more information.

UV Source

UV-C, TUV PL-L 95 watt lamp with 4-pin 2G11 base, 90 watt dosage at 254 nanometers 300J/m2 (Lamp supplied with HFLV luminaire purchase.)

Expected Lamp Life

9000 hours per Philips Lighting TUV PL-L 95W/4P HO lamp technical

Integral 95 watt Class P ballast developed for use with UV

Power Supply (Fan)

Integral 12 VDC Class 2 power supply

Voltage

120-277 VAC in 50/60Hz

Input Current (Maximum)

1.0A at 120V for UV system 0.44A at 277V for UV system

Filter

MERV 6 rigid polyester filter

Air Flow Rate

50 CFM (1.4 CMM)

Sound

35-42 dB in laboratory chamber. Actual sound level will vary depending on application. Typical office is 47-49 dB.

Wattage

115 watts

Circuits

Single circuit standard.

nLight® controls solutions are available for specific applications, please contact your Acuity Brands representative for more information

Fixture Weight

(Weight may vary depending upon options or accessories selected.) HFLV NDN: 20.00 lbs (9.07 kg)

Environment

Indoor dry location only

Ambient Operating Temperature

+68°F (+20°C) to +122°F (+50°C)

Ambient Operating Humidity

<80% relative humidity non-condensing

Disclaimer

All references to "disinfection" are referring generally to the reduction of pathogenic bioburden and are not intended to refer to any specific definition of the term as may be used for other purposes by the U.S. Food and Drug Administration or the U.S. Environmental Protection Agency. The disinfection technology as incorporated in Acuity Brands products is not intended for use in the cure, mitigation or prevention of disease and is not certified or approved for use as or for the disinfection of medical devices by the FDA. Reduction of the pathogenic bioburden is a function of fixture run time, distance to the UV light source, air flow, room size, shadow areas and/or other factors, and the level of reduction will vary within a specific space. Antimicrobial properties are built in to inhibit the growth of bacteria that may affect this product. The antimicrobial properties do not protect users or others against bacteria, viruses, germs or other pathogens

Certification

ETL Listed, Certified to UL STD 507 and CAN/CSA STD C22.2 No.

Tested to be compliant with FCC Part 15 Class A

Note: Actual performance may differ as a result of end-user environment and application.

Specifications subject to change without notice.

Consult installation instructions for additional guidelines and details.

Precautionary Statements

▲ WARNING

 Skin or eye damage may result from directly viewing the light produced by the lamp in this apparatus.

Always disconnect power before

relamping or servicing.
Replace Lamp with TUV PL-L 95W, manufactured by Philips.

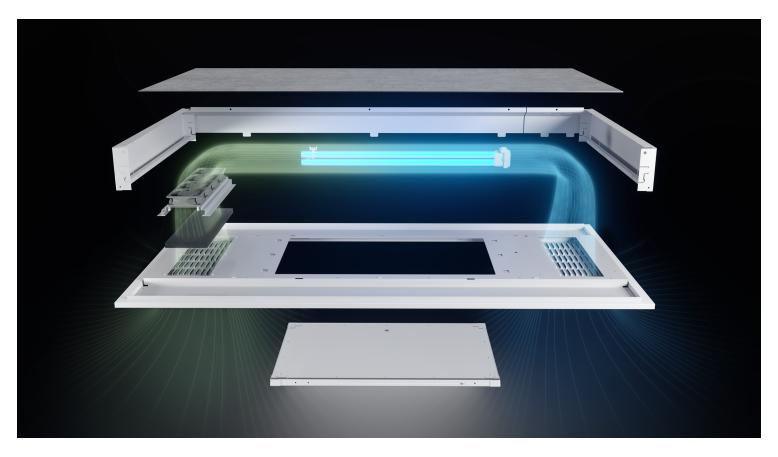

Type: Project:

UV Air Disinfection Luminaire without Downlight

TECHNOLOGY

The patented UV light technology draws air containing viruses, bacteria, and fungi into sealed UV-C chamber at 50cfm (1.4 CMM) where they are neutralized. Treated air is then circulated back out into the space. The unit treats a 100 sq. ft. room (10' L x 10' W x 8' H) (3.0M L x 3.0M W x 2.4M H), approximately four times every hour when operated 24/7/365.

Type: Project:

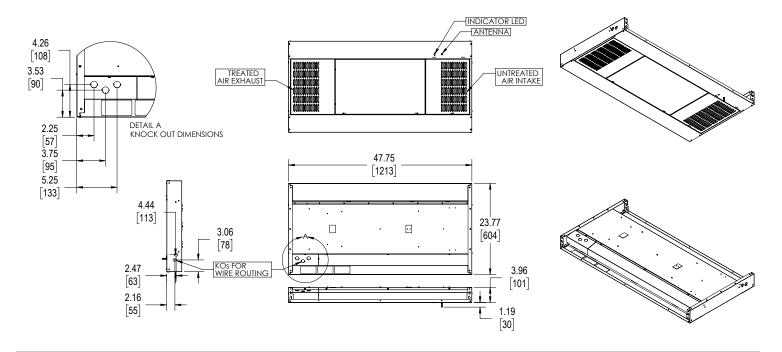

UV Air Disinfection Luminaire without Downlight

DIMENSIONS

Dimensions noted in US imperial inches with metric system millimeters in brackets

HFLV NDN

Base fixture used for recessed grid ceiling applications and for integrating with frame kits and mount adapter accessories. (Reference installation instructions for additional details on orientation and mounting of units within a space.)

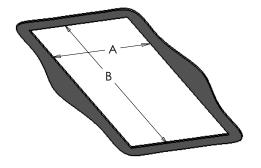

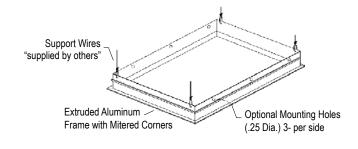

PFHFLV Plaster Frame Kit

For recessed hard ceiling mount applications.

Rough-In Dimensions

Size	A (Inches)	B (Inches)	A (Millimeters)	B (Millimeters)
